COURSEWORK

UNDERGRADUATE
Artificial Intelligence
Machine Learning
Operating Systems
Data Structure and Algorithm
Computer Network
Object Oriented Prog
Database Management System
Design Analysis and Algorithm

SKILLS

PROGRAMMING
Experienced:
• C++
• C
Intermediate:
• Python
• Java
• HTML
• CSS
• JavaScript
• SQL
• MS Excel
Familiar:
• Power BI
• React JS
• Node JS

PROJECTS

MINI META WALLET | FULL STACK
- Developed software that securely creates and imports cryptocurrency accounts.
- Utilized MongoDB for storing login and account information.
- Enabled users to perform token transactions, buy/sell tokens directly within the app, and track transaction history via Polygonscan.

ALEXA | PYTHON
- A Speech Recognition software using python
- Executed various tasks including setting reminders, playing music andmovies, accessing news, searching information on Wikipedia, and sending emails.
- Fully controlled by human voice commands.

ASPECT BASED SENTIMENT ANALYSIS | PYTHON
- Designed and developed an IR/NLP-based framework
- Identifies all aspects of entities in human reviews and captures the sentiment expressed for each aspect.
- Generates a summary listing all aspects and their overall sentiment polarity.

SNAKE MANIA GAME | C++
- A classical arcade style game
- User can control the snake and score by eating the food
- Eating food increases the snake's size and score
- Features a console-based interface.

RESPONSIVE ASSISTANT | HTML CSS JAVASCRIPT
- An extension fully voice controlled and responsive
- It enables users to efficiently complete their daily tasks.
- Saves time by checking and sending E-Mails on daily basis
- Search out queries on google, YouTube, etc

ACHIEVEMENTS

- Rank 704 Globally in first and 352 best in contest of CodeChef
- 2 Star in CodeChef
- Rank under 1000 in Interview bit
- Ranked 1st in my degree

POSITION OF RESPONSIBILITY

- Appointed as Placement Coordinator for my department.
- Vice-President (Agni Club) - organised 10 inter department coding events.
